Biography

I'm a family doctor. I'm running for congress because I can't stand by and watch any more as our leaders fight with one another and patients suffer and die at the hands of our broken health care system. I've written two books about health care: [Staying Alive](#) and [Distracted: How Regulations Are Destroying the Practice of Medicine](#). See matt-hahnforcongress.com.

1. What suggestions do you have for improving bipartisanship and cooperation in Congress?

My campaign slogan is Together We Stand. Elected leaders should take an oath to work together. We must get money and lobbyists out of politics and enact term limits for elected positions. Political campaigns should be publicly financed, with each qualified candidate receiving the same amount of funding, eliminating fundraising. We should switch to a completely open, top-two primary system.

2. What new measures would you support to help middle class families deal with the rising costs of health care, housing, and higher education?

We must increase wages with a middle-class tax cut and incentives to businesses to promote higher-paying jobs. Health care reform must include a reasonable cap on all annual out of pocket expenses. We should create more trade and vocational training opportunities in high schools and establish a national service corps that provides work opportunities in exchange for discounted college tuition.

3. What should be the role of Congress in addressing the challenges of climate change?

Climate change is both the greatest economic threat and opportunity of the 21st century. We have responded too slowly. Congress must work together with the scientific community to develop and disseminate reliable sources of information regarding climate change, and along with the business community, create a strategic plan for rapid transformation of our at-risk infrastructure and renewable energy capabilities.

Office US House of Representative Congressional District 2
Name Cathy Kunkel
Party Democrat
County of Residence Kanawha

Biography

As an energy policy expert, Cathy has testified on behalf of consumer groups to the WV Public Service Commission, fighting utility rate increases and corporate bailouts. As a co-founder of both Advocates for a Safe Water System and Rise Up WV, Cathy has fought for safe drinking water, expanded access to healthcare and better services for those suffering addiction. kunkelforcongress.com

1. What suggestions do you have for improving bipartisanship and cooperation in Congress?

We need to pass campaign finance reform laws so that Congressional representatives are actually accountable to the people of their district, not to special interests or wealthy ideological donors. I am not taking corporate money in my campaign because I believe that we desperately need more members of Congress (of either party) who are not beholden to corporate interests.

2. What new measures would you support to help middle class families deal with the rising costs of health care, housing, and higher education?

I support Medicare for All universal healthcare to cover everyone, eliminate the risk of medical bankruptcies and allow the federal government to negotiate prescription drug prices. I support greater funding for the National Housing Trust Fund, investment in repairing and modernizing existing public housing, and fully funding Section 8 rental assistance. And I support making public higher education tuition free

3. What should be the role of Congress in addressing the challenges of climate change?

We must urgently address climate change. I will fight for a Green New Deal that includes a program of reinvestment in Appalachia, including investment in infrastructure (safe drinking water, internet, transportation) and environmental reclamation. It must also include protection of healthcare and pensions for fossil fuel industry workers and priority placement in infrastructure and clean energy jobs during the transition.

Office US House of Representative Congressional District 3
Name Paul E. Davis
Party Democrat
County of Residence Cabell

Biography

I'm a native of Huntington, WV. I have been married for 37 years and have two sons who are both graduates of Marshall University. I graduated from Marshall University with an undergraduate degree in Political Science and obtained my MBA (2009) while working full time. Currently, I'm the General Manager of the Tri-State Transit Authority June 1, 2009 to present.

1. What suggestions do you have for improving bipartisanship and cooperation in Congress?

We must elect members to Congress that are willing to work toward common goals. One way is to bring back earmarks. If a Congressperson hopes to bring projects to their districts, they need to enlist the help of others across the aisle to get projects done. It needs to be a partnership for the good of all.

2. What new measures would you support to help middle class families deal with the rising costs of health care, housing, and higher education?

Raise the minimum wage for working people. I'm a proponent of affordable healthcare for all.

Raise the levels for Medicaid so that the working poor will not lose their benefits as they improve their jobs. College students graduate with too much debt. We need to provide debt forgiveness for students entering critical occupations and willing to work in economically distressed

3. What should be the role of Congress in addressing the challenges of climate change?

Congress must provide funding to promote clean energy programs for the future. We must reduce our CO2 emissions by working with car manufacturers to build emission free efficient cars. Congress must commit to reducing emissions throughout the world by changing our energy systems to 100 percent renewable energy and create 20 million jobs that will be needed to solve the

Office US House of Representative Congressional District 3

Name Jeff Lewis

Party Democrat

County of Residence Cabell

Biography

I worked for Verizon Communications for nearly 20 years. Also, I served as President CWA Local 2003 starting in 2000. I remained in my position as President until my departure from Verizon. I returned to school after Verizon obtaining my BA from Marshall in 2014 and my law degree from Florida Coastal School of Law in 2017. Website: JeffLewisforCongress.com

1. What suggestions do you have for improving bipartisanship and cooperation in Congress?

We must start putting people over party in politics. There is zero chance of getting everything either side wants. That's why I know from working with management to get issues accomplished at Verizon that the same approach must be done in Congress by giving on each side as much as possible where a solution can be reached in the middle.

2. What new measures would you support to help middle class families deal with the rising costs of health care, housing, and higher education?

I would primarily propose that a family of four making less than \$40,000 a year would be tax-exempt. I also would make it easier for the middle class to obtain housing subsidies, guaranteed federal loans for home ownership, and free college education as long as the student did a certain number of community service hours while in school.

3. What should be the role of Congress in addressing the challenges of climate change?

First, the limits on carbon emissions that had been put in place on auto makers and then rescinded, must be fully restored. Also, carbon capture technology must be used in all industries where its economically feasible. The funding for the study of climate change must be restored back to levels on par with other industrialized nations.

Office US House of Representative Congressional District 3

Name Hilary Turner

Party Democrat

County of Residence Cabell

Biography

Hilary Turner holds a Bachelors in International Studies and Environmental Science. She has been a teacher for 10 years in public and private schools, and taught English in Brazil. She's a yoga teacher, and has been an activist since high school. Her family has had a farm in Greenbrier county for six generations, and she lives in Huntington. turnerforcongresswv.com

1. What suggestions do you have for improving bipartisanship and cooperation in Congress?

We should pass anti-corruption bills that eliminate corporate funding in politics so both sides can focus on addressing the needs of the people without the influence of corporations. Most gridlock is due to conflicting corporate interests. We also need to be more willing to sit down and have conversations, and be willing to listen to each other openly

2. What new measures would you support to help middle class families deal with the rising costs of health care, housing, and higher education?

I would support single-payer Medicare for All that would eliminate healthcare costs and minimize prescription drug prices for individuals. I would also support tuition-free higher education to help young people pursue their education, as well cancelling student loan debt. For housing, I support tenants rights, such as national rent control and a homes-for-all guarantee to eliminate homelessness

3. What should be the role of Congress in addressing the challenges of climate change?

We need to be directing national funding in the right places. We can redirect the \$600 billion in fossil fuel subsidies towards renewable energy. Congress must also fund ecological restoration projects such as reforestation, water restoration, and regenerative agriculture. All of this can be done through a Green New Deal that aims at transitioning the nation to total carbon neutrality.
