**No Reply**

**Office** US House of Representatives Congressional District 2  
**Name** Cathy Kunkel  
**Party** Democrat  
**County of Residence** Kanawha

### **Biography**

As an energy policy expert, Cathy has testified on behalf of consumer groups to the WV Public Service Commission, fighting utility rate increases and corporate bailouts.

As a co-founder of both Advocates for a Safe Water System and Rise Up WV, Cathy has fought for safe drinking water, expanded access to healthcare and better services for those suffering addiction.

### **1. What changes would you recommend for responding to any future national emergencies such as COVID-19 which would increase overall preparedness and assist those affected by the emergency?**

I support full funding for the CDC, whose budget has been cut by 10% over the last decade, so that we can be better prepared for a future public health emergency. I also support urgent action on climate change, which is leading to more frequent and severe hurricanes, flooding and wildfires around the country.

### **2. What do you believe should be the role of the United States in global affairs such as trade, immigration, and the environment?**

I believe that the United States should negotiate trade agreements with strong labor and environmental standards, and that we should be a leader in addressing global environmental crises such as climate change. Regarding immigration, I am opposed to the inhumane treatment of people under the care of the U.S. government, including family separation at the border.

### **3. Do you support recent weakening of EPA regulations concerning air and water quality? Why or why not?**

I do not support recent weakening of Environmental Protection Agency air and water quality regulations. These regulations are necessary to protect public health. Moreover, the weakening of these regulations has done nothing to bring back the coal industry, whose decline has been triggered by competition from natural gas and renewable energy, not environmental regulations.

### **4. Considering the issues raised by COVID-19, what changes need to be made at the federal level to make affordable healthcare available to all Americans?**

It is unacceptable that Americans have died from COVID because they didn't seek treatment for fear of the medical bill. Additionally, over 60,000 West Virginians lost their private health insurance because of losing their

jobs during this pandemic. I support Medicare for All universal healthcare in which everyone is covered and no one risks bankruptcy for seeking necessary medical care.

**5. What changes to current election laws would you recommend to make voting safer and more accessible?**

I support restoring the federal Voting Rights Act, so that states with a history of voter suppression have to get clearance from the federal government before making changes to their election procedures. This would crack down on burdensome voter ID laws, polling place closures and other state-level voter suppression tactics.

**Office** US House of Representatives Congressional District 2

**Name** Alex X. Mooney

**Party** Republican

**County of Residence**

**No Reply**

**Office** US House of Representatives Congressional District 3

**Name** Carol Miller

**Party** Republican

**County of Residence** Cabell

**Biography**

I am a wife, mother, grandmother, small business owner and bison farmer representing West Virginia's 3rd Congressional District. I'm working to grow our economy, create new well-paying jobs, support our law enforcement, and protect Social Security and Medicare. I'm endorsed by President Trump and West Virginia Right to Life. Learn more at [www.ElectCarolMiller.com](http://www.ElectCarolMiller.com)

**1. What changes would you recommend for responding to any future national emergencies such as COVID-19 which would increase overall preparedness and assist those affected by the emergency?**

It's critical that we refill our national protective equipment stockpile and find a vaccine to stop the spread of the ongoing pandemic. We must communicate information quickly and trust science to accurately alert vulnerable populations like seniors and immunocompromised individuals. It's also essential that we rebuild our economy to protect our small business owners and workers from financial instability.

**2. What do you believe should be the role of the United States in global affairs such as trade, immigration, and the environment?**

I'm advancing high-quality trade deals that level the international playing field and promote West Virginia's exports to create jobs and grow our economy, and implementing a Congressional Energy Export Caucus. I support strengthening our borders to keep illegal drugs out of our country. We must conserve our state's natural beauty and work to promote our outdoor tourism industry.

**3. Do you support recent weakening of EPA regulations concerning air and water quality? Why or why not?**

The War on Coal devastated our energy economy and left many people unemployed and hopeless. I am working to cut the overburdensome regulations that make it difficult to do business in our state, so we can continue to power the country and the world with West Virginia coal, oil, and gas, while also protecting our environment for future generations.

**4. Considering the issues raised by COVID-19, what changes need to be made at the federal level to make affordable healthcare available to all Americans?**

I support initiatives that increase telehealth services and improve healthcare access in our rural communities. We must repeal policies that make healthcare less affordable and reduce the quality of care. We need to protect Medicare for those who need it, cover preexisting conditions, lower prescription drug pricing, and combat the opioid epidemic by investing in rehabilitation and recovery.

**5. What changes to current election laws would you recommend to make voting safer and more accessible?**

Continuing to overhaul our voter registration database to remove deceased and inactive voters so our elections can more accurately represent the voters' decisions. We must also install safe and responsible protective equipment at our polling places so that people have the confidence to vote in-person when possible. Our country clerks do a terrific job and we must support their efforts.

**Office** US House of Representatives Congressional District 3

**Name** Hilary Turner

**Party** Democrat

**County of Residence** Cabell

### **Biography**

Hilary received her bachelor's degree in International Studies. Hilary has worked as a teacher and in healthcare, and she is a mother. At 32, She is the youngest woman to run for federal office in West Virginia's history, and the first woman to be the democratic nominee for the 3rd congressional district. Her website is [TurnerforCongressWV.com](http://TurnerforCongressWV.com)

#### **1. What changes would you recommend for responding to any future national emergencies such as COVID-19 which would increase overall preparedness and assist those affected by the emergency?**

I would recommend that we fund a task force to watch for potential pandemics to help contain them. I would recommend that we have a supply of protective equipment, open more healthcare facilities and train more doctors so our hospitals aren't overwhelmed. I would have funds in place to ensure that we can get as much testing as possible earlier.

#### **2. What do you believe should be the role of the United States in global affairs such as trade, immigration, and the environment?**

Congress should make sure that any trade deals protect American workers and American small businesses. We should pass immigration reform to allow people to come here to work legally, and treat immigrants with dignity. The United States should take action on climate change and protect our water for the health of our communities and futures of our children.

#### **3. Do you support recent weakening of EPA regulations concerning air and water quality? Why or why not?**

No I do not. We need to protect our air and water for the health and wellbeing of our children, families, and communities. I know that we can have a strong economy and plenty of jobs without polluting our air and water.

#### **4. Considering the issues raised by COVID-19, what changes need to be made at the federal level to make affordable healthcare available to all Americans?**

I support universal healthcare. I believe that healthcare is a human right and no one should die because they couldn't afford to see a doctor or pay for prescriptions. A universal healthcare system would ensure that we have a healthier society and that we are better able to handle a public health crisis like a pandemic.

#### **5. What changes to current election laws would you recommend to make voting safer and more accessible?**

Everyone should automatically be registered to vote. Election day should be a national holiday so that everyone has the opportunity to vote, and no one has to take off work. Additionally everyone should automatically be sent a mail-in ballot to make voting safer for all.
